

Energizing your Bottom Line

Going Green will save you Green

Large manufacturers, health care facilities, data centers and companies that are dependent on the usage of large amounts of energy are under continuous pressures to reduce operating costs and provide higher quality services with less financial resources.

Many of the traditional avenues to reduce operating costs have been exhausted. Our unique approach to restructuring energy costs through tri generation technology presents companies with the opportunity to reduce their total energy costs by up to 60%. These are dollars that fall directly to the bottom line.

Key Benefits from using Tri-Generation Technology

- Reduces carbon footprint by up to 87%
- Save 45% to 60% on energy bills
- Return on investment is less than 3 years
- Lifecycle ROI from 250% to 400%
- Independence
- LEED certification helps to qualify for energy incentives/grants and funding.

Northex Group and its strategic partners simplifies an overly complicated process.

Northex Group offers business owners and managers the peace of mind that comes with a comprehensive service that will save you time and money. After we work diligently to understand your needs and goals, our strategic partners bid-out your business to energy suppliers. Multiple 'Request for Quote' forms are sent to suppliers as we handle the posturing with big energy companies so you don't have to. Lastly, when the offers come in, we make sure you get the best rate-plan possible by analyzing the current markets' risk and price volatility, reviewing and managing the incoming offers, and checking the fine print for hidden costs or risk.

Tri Generation Technology

It's your Choice, don't be left in the dark...

Just Fax or E-Mail a copy of your last energy bill to us or call us to set up a free, no obligation consultation with one of our energy specialist.
